Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, figure 1, is directed to a cavity filter having a circuit board with an interstage coupling and input/outputs on the ends;

Species II, figure 2, is directed to a cavity filter having a circuit board with an internal trace and an additional connector;

Species III, figure 3, is directed to a cavity filter having a circuit board with an external coupler and tuning stub;

Species IV, figure 4, is directed to a cavity filter having a circuit board which has a low noise amplifier circuit coupled to an input/output and an end cavity of the filter;

Species V, figure 5, is directed to a cavity filter having a circuit board with tuning screws through the board;

Species VI, figure 6, is directed to a cavity filter having a circuit board with a low noise amplifier that couples two stages of the filter;

Species VII, figure 12, is directed to a cavity filter having a circuit board with an additional low pass filter;

Species VIII, figure 13, is directed to a cavity filter having a circuit board with connectors on the side of the cavity filter and having no relation between the component on the board and the cavity filter.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears that no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen E. Jones whose telephone number is 703-305-0390. The examiner can normally be reached on Monday through Friday from 8 AM to 4 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert J. Pascal can be reached on 703-308-4909.
